NYSERDA Transitions to Single Statewide NY-Sun Incentive Program

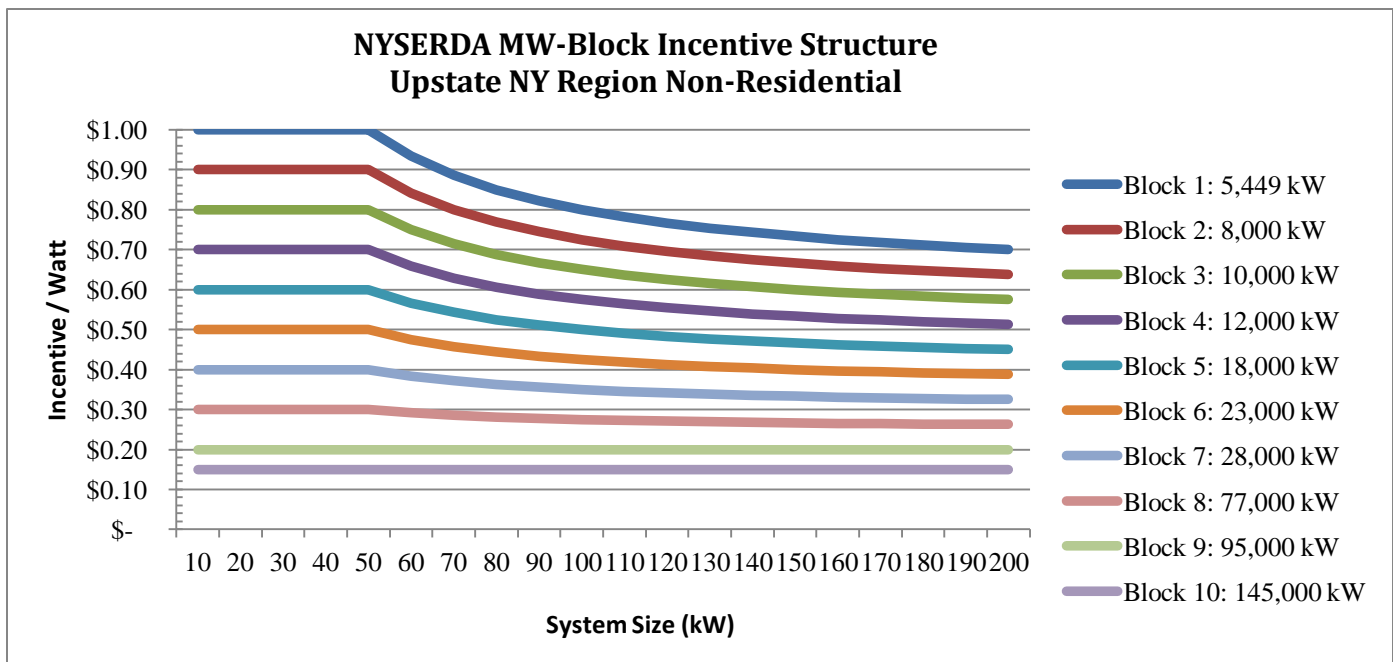

Reading, Pennsylvania - September 3, 2014. RER Energy Group, as a certified NYSERDA contractor, announces their anticipated participation in the NY-Sun MW Block Program for funding New York State solar projects.

In August 2014, NYSERDA began the transition of the state’s multiple solar programs to a single, statewide incentive program called the MegaWatt (MW) Block Program. This effort is designed to support the State’s vibrant solar economy, which has consistently been in the top 10 US solar markets. The NY-Sun Initiative supports the deployment of solar energy technologies with programs and incentives available to customers in New York State. Pursuant to NY Governor Cuomo’s states commitment to the NY-Sun Initiative, New York State has committed \$1B to developing a self-sustaining solar market in New York State, with a target of 3 GW of solar PV installations across New York State by 2022.

Under the MW Block incentive structure, each sector is assigned a series of MW targets at certain incentive levels, referred to as “blocks”. As applications are submitted, incentives are assigned and the kilowatts (kW) associated with the applications are added together and the units are converted to MW. When the MW target for that block is reached, the block is closed and a new block, with a new target and a lower incentive level, is started. Once all of the blocks for a particular region and sector are filled, an incentive for that region and sector will no longer be offered.

Megawatt Block Sectors:

- Nonresidential systems (up to 200 kW)
- Nonresidential systems (larger than 200 kW available in spring 2015)

Empower Your World.

About RER Energy Group

RER is an industry leader in providing cost-effective, high quality solar systems throughout the Mid-Atlantic region. The company's team has developed over 20 megawatts of solar energy systems and obtained over \$15 million of grant proceeds for commercial, industrial, agricultural, municipal and non-profit customers.
