bringing expertise gained over more than a decade of working in the nonprofit and government sectors in areas of corporate law, regulatory compliance, public policy and advocacy, among others. Rodney proactively reached out to RER Energy and expressed a desire to transition to Solar Development after successfully completing a Power Purchase Agreement for his former employer.

Rodney's experience extends from 10 years as In-House Counsel and Director of Regulatory Compliance with Horizon Goodwill Industries in Hagerstown, Maryland, where he handled all legal aspects of the \$20 Million organization.

His career accomplishments also include an appointment to the position of Legislative Liaison for two Governors of North Carolina, and appointment to two terms as Commissioner with the Greencastle Area, Franklin County (Pennsylvania) Water Commission/Sewer Authority.

In addition, Mr. Rose's tenure with the State Government and the Municipal Authority afforded him the opportunity to review state and municipal government projects and assess them based on sustainability and cost effectiveness for the taxpayers of his community.

Rodney's current concentration is in developing projects for Non-Profit Organizations, Municipalities, School Systems and Private Enterprises. Additionally, he is involved in the creation and legal review of many of the contractual documents necessary to bring solar projects to life.

Rodney's unique combination of legal knowledge, government, and business experience enables him to collaborate with Boards of Directors and C-level executives to guide them on how to best implement solar to positively boost their bottom line.
