

Renewable Energy Free Workshop

Cash Savings through Solar Electric Systems

Case Studies of Solar Electric Systems, Technology Considerations, Incentives & Financing

RER Energy Group is pleased to offer a workshop on best practices for implementing solar electric systems for commercial, industrial and agricultural facilities in regards to technology and funding options.

Who Should Attend: This workshop benefits management and technical personnel responsible for investigating and managing electrical energy systems. You will have the opportunity to ask questions about photovoltaic technology and incentives from the experts at RER Energy Group. RER has developed over 50 solar electric systems and is a leader in the solar industry with over 5 megawatts developed to date. Solar offers a good investment, providing paybacks of approximately 5 years, for systems that will last 30–40 years. **Prices for turn-key solar electric systems have fallen 50% in the last 3 years.**

The **Financial Session** will focus on available incentives & options:

- 1) Federal & State Grants and Incentives;
- 2) Accelerated Deprecation;
- 3) Solar Renewable Energy Credits (SRECS) – A Plus, not a Requirement for attractive payback periods;
- 4) No Money Upfront Lease.

The **Technology Session** will focus on best practices:

- 1) Types and Considerations;
- 2) Installation Configurations;
- 3) Case Study Examples.

When: Thursday, June 28th, 8:00 AM to 10:00 AM

**Where: Reinsel Kuntz Leshner, CPAs
1330 Broadcasting Road, Wyomissing, PA 19610**

Space is Limited. Reserve your seat soon. To submit your registration, e-mail: bmaholick@reenergygroup.com, or print this form and fax to 888-712-0734. If you have any questions, call Betsy at 610-577-6887.
