RER Energy Group Reaches #802 on 2016 *Inc. 5000 Annual Fastest Growing Companies*

Company attributes their revenue growth to providing clients with solar savings, education, and transparency as the core of their corporate culture.

In just its second year of participating in the Inc. 5000 annual survey, RER Energy Group (RER) catapulted from #4090 on the 2015 list to #802 in 2016.

According to Jim Kurtz, President of RER, “We have experienced significant growth over the last few years because solar simply makes sense economically, and we do a good job of both explaining how solar savings work, and collaborating with our clients to ensure they capture as much of these savings as they can. Once our clients experience the savings they see with solar, and appreciate the low maintenance of this investment, they often come back to do more, and testify to others of the effectiveness and ongoing energy saving. The resulting word-of-mouth has spread from company CFOs to facility directors and leaders of non-profit organizations. These individuals are all realizing that with the right financing package, (often through our partner company Sunvestment Energy Group) solar energy leads to a material reduction in energy costs—and will continue to do so at a predictable rate for 30 years or more.”

Empower Your World.

Other notable accomplishments for RER include completing the largest community solar project in Iowa, the largest public school solar project in New York, two solar arrays in Mexico, and achieving the #1 solar developer ranking in Pennsylvania, according to Solar Power World magazine.

The Inc. 5000's aggregate revenue is \$200 billion, and the companies on the list collectively created 640,000 jobs over the past three years.

"As a company working in the new energy economy, we have witnessed the growth in our industry first hand. We're thrilled that this growth is leading to great jobs and tangible benefits for our clients in the business, agricultural, municipality and non-profits communities." Kurtz said. "We're incredibly excited for the future. We are realizing additional revenue and job growth this year and look forward to sharing the benefits of the free fuel from the sun with many new clients to come."

About RER Energy Group

RER Energy Group is an industry leader in providing cost-effective, high-quality solar systems throughout the United States and Latin America. The company has developed more than 30 megawatts of solar energy, obtaining over \$25 million in grant proceeds for commercial, industrial, agricultural, municipal, and non-profit customers.
