Officer

1994 - 1995:
The Hartford, Vice
President

Education

MBA
Smeal College of Business
Penn State University

B.A. Humanities
Lock Haven University

Role/Relevant Project Experience

Chris has been working in the sustainable energy market place since 2009. He co-wrote and teaches a course on sustainable energy entrepreneurship in the Energy and Sustainable Policy degree program at Penn State University. He is a professor at the Dutton Institute at Penn State University.

Prior to joining RER, Chris served as the head of business development for the Sustainable Energy Fund, where he worked to provide financing for over U.S. \$40 million worth of renewable energy projects.

Chris has more than 20 years of professional experience in sales, marketing, financial services, brand development, and management. He has held positions with The Hartford, York Federal S&L, and Olympic Amis Ltd London, England.

Chris brings his diverse experience and industry expertise to a variety of key initiatives for the company, looking for ways to scale the business and expand the service offerings we can deliver. Naturally curious, Chris brings great questions to our discussions and exploration of new industry opportunities—such as community solar—and expands our access to and relationships with a range of strategic partners. In addition, Chris has played a key role in conceptualizing and advising RER's sister company, Sunvestment Energy Group, looking for ways we can expand our efforts to bring down the cost of capital for solar projects in the mid-market space.

Chris volunteers for health-related charities, including serving on the board of the Jay Effross Memorial Fund in the Pocono Mountains of Pennsylvania. He is also a Certified Renewable Energy Professional with the Association of Energy Engineers.
