

Dennis Satnick

Solar Project Developer

Role/Relevant Experience

Work History

2013 - Present:
RER Energy Group
Sunvestment Group
Senior Consultant

2012 - 2013:
Solar Universe –
Annapolis
VP of Development

2009 - 2010:
Neuwing Renewable
Energy, LLC.
Co-Founder/Principal

2005 - 2008:
Renewable Power
Partners, LLC.
Principal

Education

B.S., Architecture
Penn State University

Dennis has spent the last eight years in the solar industry leading the development of projects from commercial rooftop systems to utility-scale Power Purchase Agreements (PPAs) throughout Maryland, New Jersey, and Massachusetts. His skills include: project development, site assessments, finance, and strategic alliance expansion.

Prior to his involvement in solar, Dennis had a successful track record in identifying, acquiring, and permitting a wide range of residential real estate projects. He acquired, developed, and built more than 500 homes in Pennsylvania with Harkins Property, LLC. In this capacity he was directly responsible for all land purchases, title-specific documentation, title searches, ROW agreements, landowner correspondences, and project marketing materials. Dennis was also instrumental in coordinating all zoning, permitting, due diligence, and required governmental approvals, in addition to providing all direct hands-on supervision for all land development and infrastructure installations.

Dennis's solar experience before joining RER includes work with Solar Universe in Annapolis and Neuwing Renewable energy. While at Neuwing, Dennis sourced and permitted approximately 40MW of ground-mounted, utility-scale solar PV programs. He established the policies and procedures needed to successfully convert an average of 20% of pre-qualified leads into interconnected projects. Prior to these experiences, Dennis was also a co-founder and participating partner with Renewable Power Partners, where he sourced and secured permitting for approximately 5MW of ground-mounted, utility-scale PV systems.
